

# Most client work stays under NDA. PawStay shows the design process when it can't.

Trust-first mobile concept for pet owners — redesigned from a Behance proposal into a clear flow: discover → trust → book → request sent. Light and dark mode.

| STUDIO                | ROLE             | PLATFORM     | FOCUS           |
|-----------------------|------------------|--------------|-----------------|
| Galanta Design Studio | Product Designer | Mobile (iOS) | Trust & booking |

## REDESIGN

PawStay was restructured around how people book pet care — fewer competing priorities, sharper hierarchy, one path from discovery to sent request.

## WHAT USERS NEEDED

- **Trust first** — verified sitters, reviews, pricing upfront.
- **One job per screen** — no dashboard dump on day one.
- **Honest states** — request sent ≠ booked.

## DESIGN OUTCOMES

| Clearer home                                  | Trust on profile                    | Booking that adds up              |
|-----------------------------------------------|-------------------------------------|-----------------------------------|
| Intent-first categories, one featured sitter. | Reviews & verification before book. | Summary total + pay after accept. |
